

USMC Approach: Implementing IUID

Ms. Carla Lucchino
SES, USMC, ADC I&L

28 July 2009

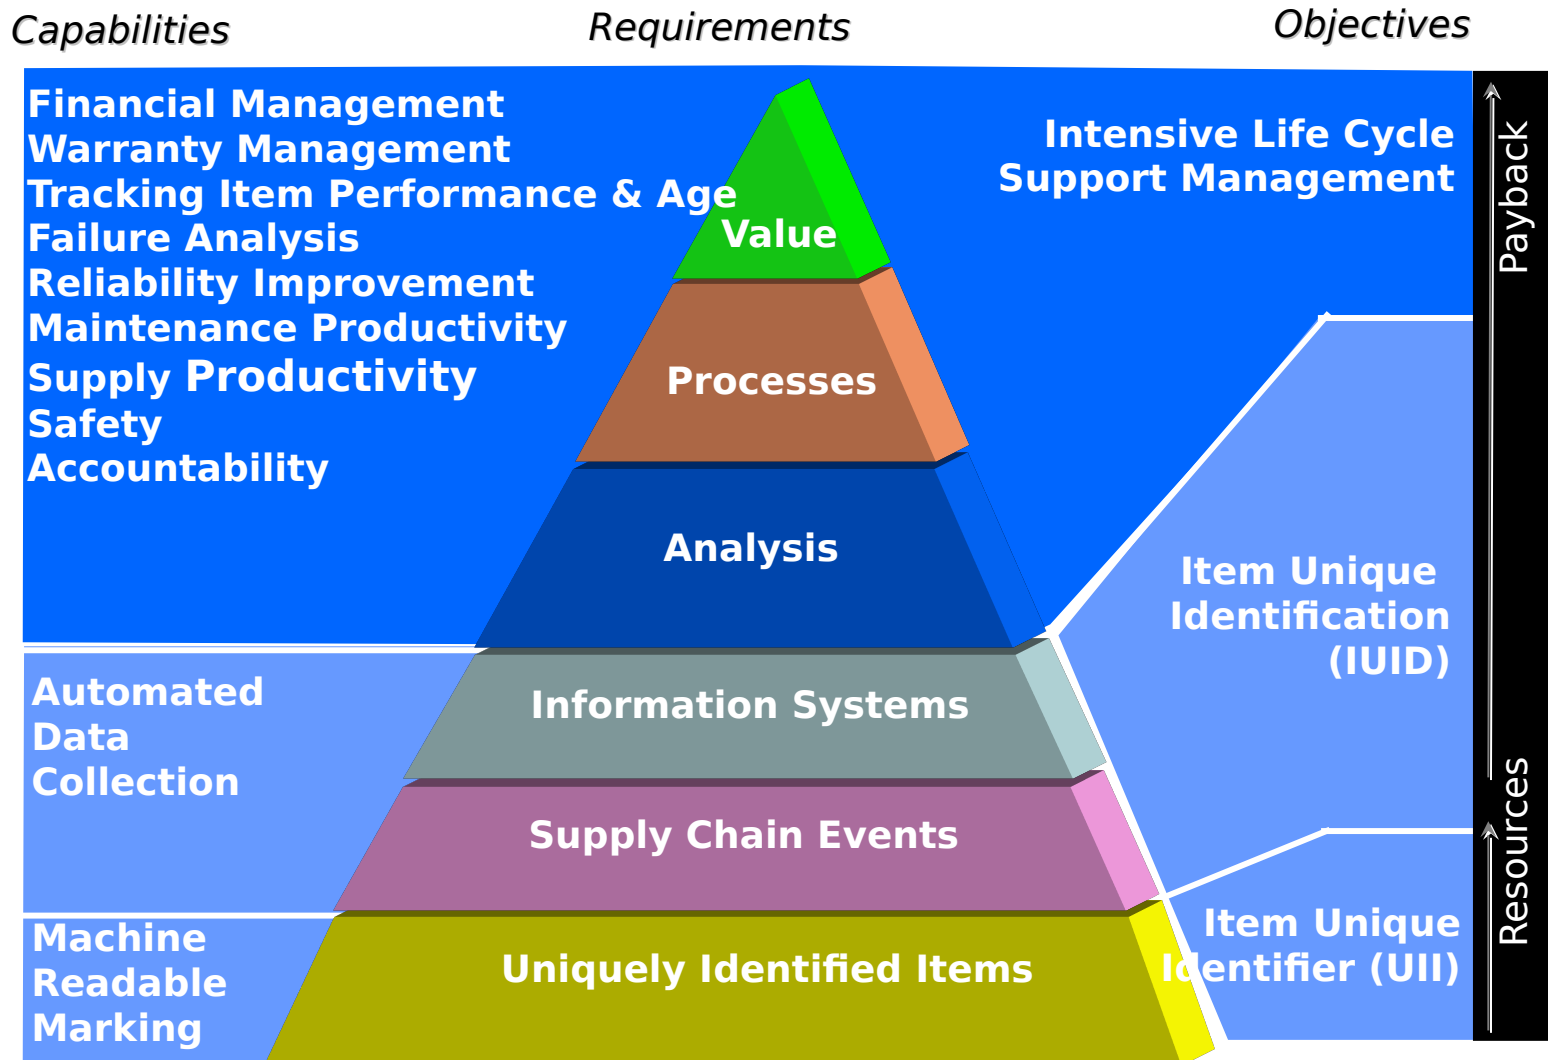

Data Sources Requiring UID Relation

UID is the **CRITICAL LINK** to relate Item data among it's many, diverse users

IUID Enabled Life Cycle Support Management

Marking the Equipment

- New Acquisitions
 - MCSC and I&L (LB)
 - DFARS 252.211
 - QA
- Legacy Equipment Marking
 - Process
 - Collect pedigree data
 - Conduct engineering analysis and create marking instructions
 - Produce/apply Unique Item Identification (UII) labels
 - Populate registry, temporarily store, and maintain UII data until GCSS-MC transition.

Marking the Equipment (cont.)

- Legacy Equipment Marking
 - Strategy
 - Enterprise approach
 - Seek and Apply in OPFORS
 - III MEF, II MEF & I MEF, & MFR Mission Essential, Phase I (MEP-1)
 - PEI and SECREP selection methodology
 - FSR at Reparable Issue Points
 - Streamlined Marking Instructions
 - No ECPs and TIs if possible
 - PM's retain authority
 - Labels
 - Make only if necessary
 - Enterprise Barcode Service (EBS)
 - Data

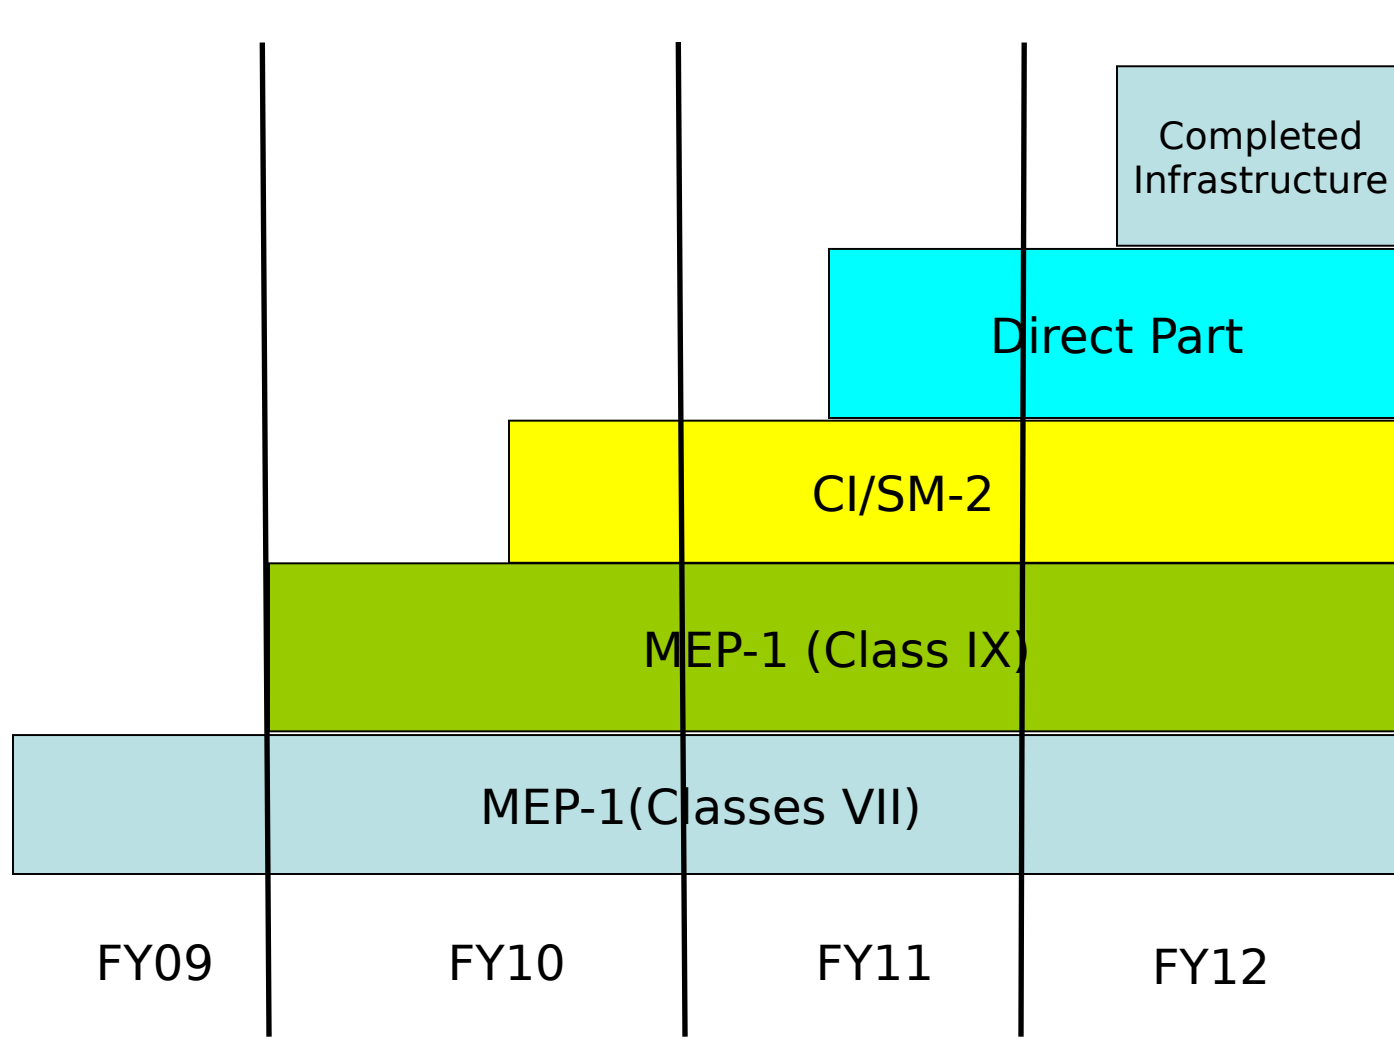

Marking the Equipment (cont.)

- Legacy Equipment Marking
 - Base Property
 - Via DPAS
 - In conjunction with inventories
 - Fewer label durability issues than tactical items
 - Maintenance Centers
 - Items in work and SECREPs exposed in work
 - Still requires PM involvement and SOWs
 - MPF
 - Marking at during MMC at BIC
 - MCPP-N

Legacy Marking

Using the IUID Mark

- Strategy documents
 - MCO (awaiting signature)
 - IUID Strategy (draft)
- Automate Processes
 - GCSS-MC and other AIS
 - PMLAV Early Employment with JAMISS
 - Automated Armory Pilot
- Timeline
 - Funding of legacy effort
 - AIS development
 - Policy
 - Resource
